03/31/09 SAM Notes ~~for~~ Subject Re: rico-argentine draft HRS package  
HRS Package action closed today with NFRAD action, since much of the site has been or is still being addressed under Voluntary Cleanup Program. CDPHE is requiring Institutional Controls prior to approval of the VCD  
As I'm sure Johanna remembers - decision

We collected samples for the site under an SI and were told to prepare for sampling the site for an HRS package. However, the lead and arsenic levels in soil were so high it was referred to the removal program. David Williams told Bryan Williams to not prepare a package at that point because the city of Rico was so politically against any HRS stigma. We did removal assessments, and the city opted for the PRPs to do a VCUP. Max Dodson was involved in the community meetings. At that point our work ended. We were never told to conduct any further work on an HRS package for the site. We closed the TDD with a stop work memo.

We submitted no package because we were told to stop work. There is a huge removal assessment report however.

Subjectrico-argentine draft HRS package

Chuck, In order to close out an HRS action shown in CERCLIS, I need the documentation to show the work was done. I also need some basis for the decision I'd like to make.

We have no copies of the draft HRS package put together for the site in the regional record center; since it is not listed in our index, it should have gone with the START2 archive documents. I am assuming the draft never went from David Williams to the record center, and Gwen does not have it either. Can you please have a search started for this START2 HRS package? The actual start date for the HRS package was 10/09/2003. Thanks!

Sincerely,

Sabrina Forrest
